

Maximo®
as a Service

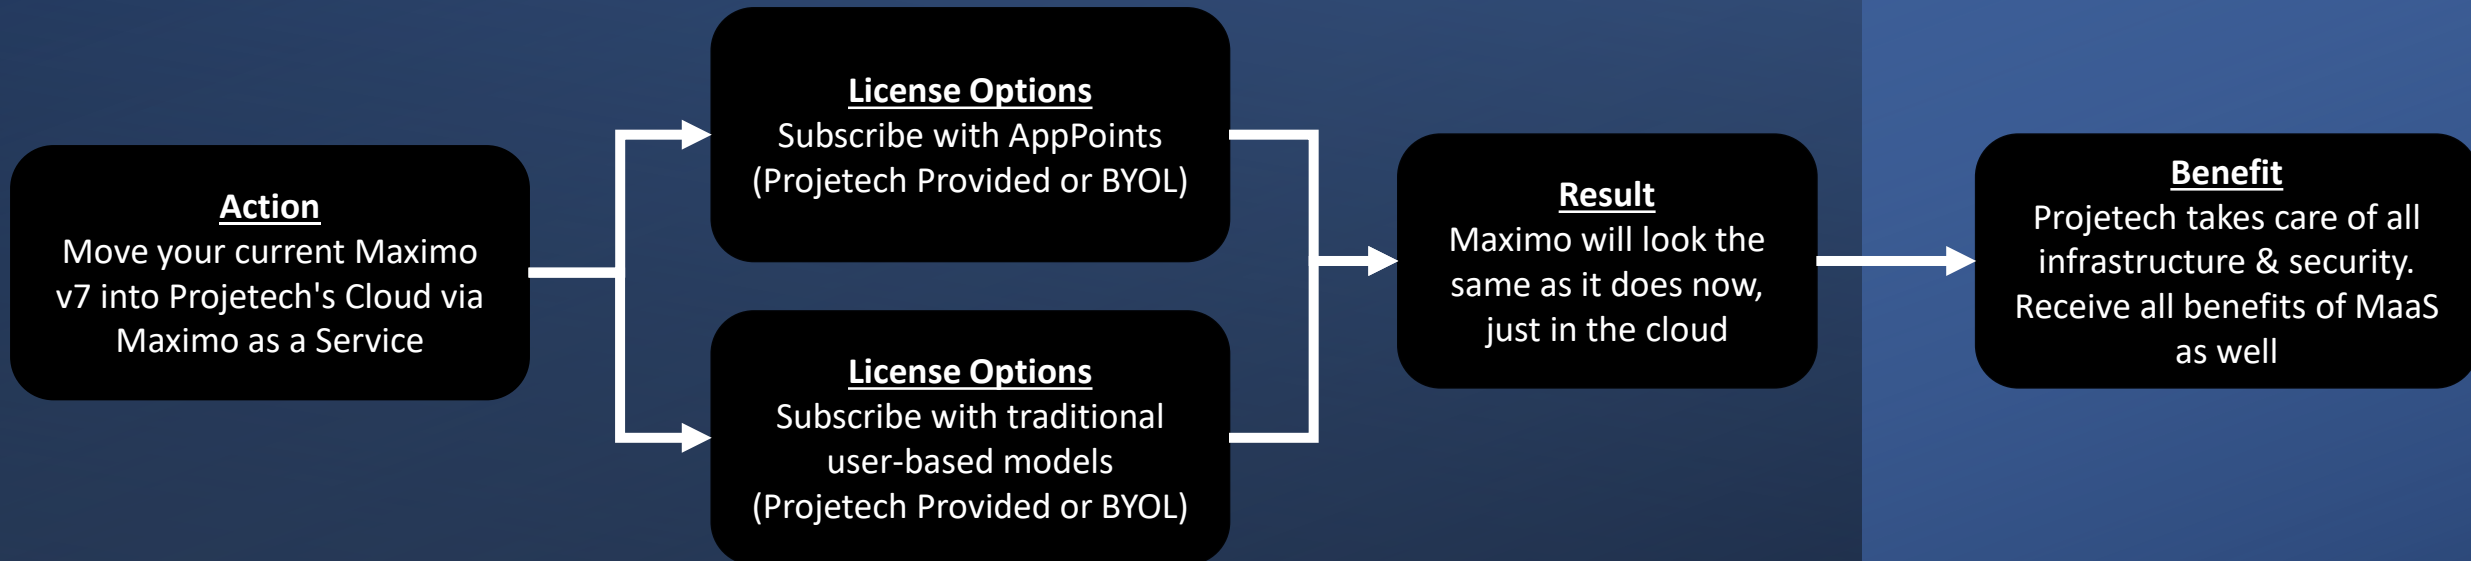

Maximo as a Service or “MaaS” is a Managed Service solution that provides a secure and fully supported Maximo application via Projetechn’s cloud.

- 100% Maximo Focused
- Delivering MaaS since 1999
- 38 Maximo Application Suite (MAS) Environments Deployed, 8 Live in Production
- Manage ~1,000+ VMs Daily
- Industry Leading Partner Network
- 6 Worldwide Datacenters
- 180+ Maximo Production Environments Worldwide
- Maximo InfoSec Shop
- IBM Business Partner since 1995

Projotech offers an optimized, secure, stable and scalable Maximo Application Suite (MAS) instance provided as a Maximo as a Service (MaaS) subscription available via the Projotech Cloud.

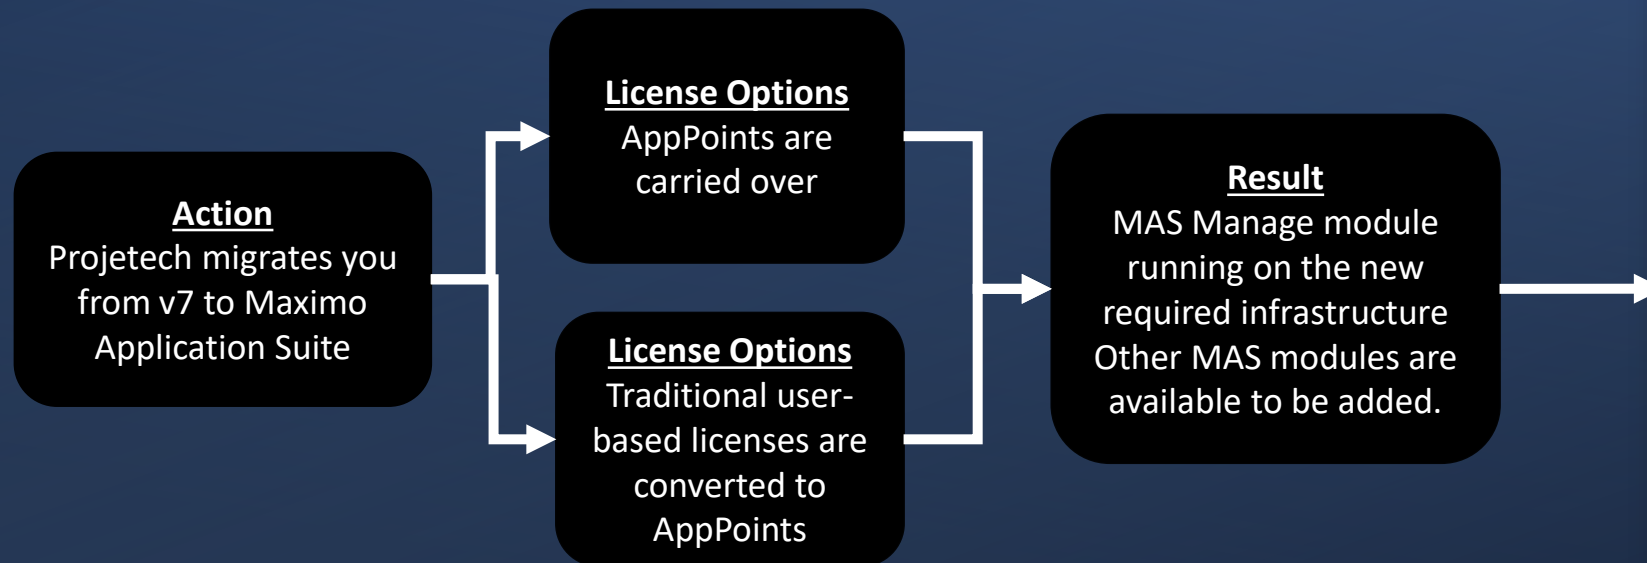

Projotech will support your current Maximo systems and provide the migration to MAS based on your timeline and your requirements.

Maximo as a Service

Projotech will not force you to migrate to MAS. Extended support is available past the Maximo v7 end of support dates.

When your team is ready, we'll migrate you to MAS Manage and will take care of all the backend technical changes so you can focus on the new MAS capabilities. This is all included with your Maximo as a Service (MaaS) subscription.
