The Cohesive Advantage: Services & Solutions for Asset Excellence

Optimizing asset reliability, availability & lifecycle value.

Cohesive

Who We Are

An independently operated brand of Bentley Systems.
We partner with to deliver cutting-edge solutions.

As a globally trusted asset management solutions company, we empower owners and operators of complex assets and infrastructure to maximize value across the asset lifecycle by leveraging leading technology platforms and digital, data-driven practices.

We do this by:

Enabling real-time visibility

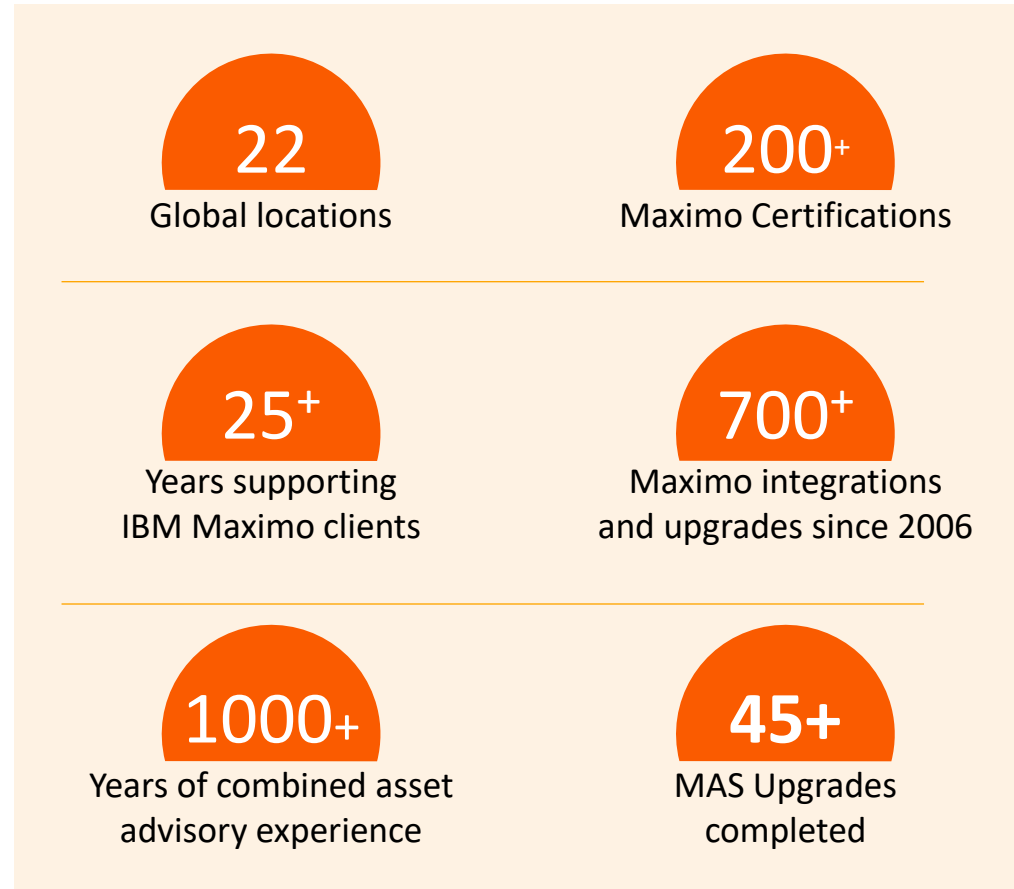

Connecting data

Synchronizing workflows

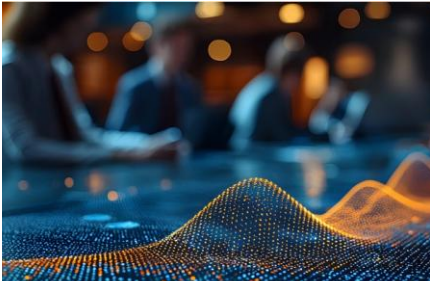

Transforming asset performance and reliability

How We Help

Delivering services that unlock asset performance excellence.

Advisory

Providing expert guidance and support to help you develop and implement effective asset management strategies, optimize your operations, and maximize your ROI.

Implementation

Helping you implement and deploy leading enterprise asset management (EAM) and facilities management solutions, ensuring a smooth transition and optimal system configuration.

Hosting

Providing secure and reliable hosting services for your EAM and facilities management solutions, ensuring your systems are always available and performing at their best.

Data Services

Helping you manage, protect, and get the most out of your data. Our data services include everything from data migration and integration to data quality management and advanced analytics.

Industries We Serve

Energy

- Oil & Gas
- Utilities
(Electric, Gas, Water)
- Nuclear
- Renewables
(Solar, Wind, Hydro)

Powering the world with reliable and sustainable energy solutions.

Transportation

- Rail & Metro
- Airports
- Road & Highways
- Ports & Marine

Enabling smarter, safer, and more sustainable transportation networks globally.

Industrial Operations

- Mining
- Manufacturing

Optimizing efficiency and productivity across asset-intensive industries.

Defense

Enhancing operational excellence by combining secure offline capabilities, proven reliability strategies, and advanced configuration tools.

What Makes Cohesive Unique

We are

Hands-on industry experts

Our consultants stand-out with **1000+** years of combined industry experience and are driven to use that expertise to help you achieve your goals.

- Decades of real-world EAM experience across industries like nuclear, oil & gas, rail, and utilities.
- Beyond implementation – aligning EAM strategies with business goals for long-term success.
- Experts in legacy system modernization and change management, ensuring smooth adoption.

Experts in Maximo

We **specialize** in integrating and configuring the leading EAM solution to meet your needs with speed and confidence.

- Specialists in IBM Maximo & MAS with deep expertise in integration & customization.
- Beyond system integrators – we map business processes to technology, not the other way around.
- IBM Platinum Partner, influencing the MAS roadmap and providing clients early access to new capabilities.

Adept at handling your data challenges

We are **experts** in handling data in the built environment, and passionate about unlocking its hidden value.

- Industry-leading certifications in RCM, FMEA, RBI, IAM, and CRL – we set the standard for reliability.
- Experts in data transformation for the built environment, unlocking hidden value.
- Proven track record of long-term customer partnerships, with renewal rates exceeding 80%.
